

ABOUT VIKRANT GROUP OF INSTITUTIONS

Vikrant Group of Institutions (VGI) represents a fast growing multi-disciplinary Educational Group in Central India. Established in 2007, VGI today runs several Educational Institutes offering higher technical education across two major cities – Indore and Gwalior in M.P, India. Approved by AICTE, New Delhi, Ministry of HRD, Govt. of India, our institutes provide quality education in the field of Engineering, Management, and Nursing. All these courses are affiliated to the renowned Universities of Madhya Pradesh.

As far as infrastructure is concerned, Vikrant has various laboratories for Engineering, Management, and Nursing courses. Students are taught by highly educated and competent faculty to build their successful career.

Shri Rakesh Singh Rathore is the Chairman of Vikrant Group of Institutions (VGI). He is not only the driving force but a visionary and a well-known educationalist in the region. Before entering into the education line, he served at a Senior position as Civil Engineer with the Government of Madhya Pradesh. Today, he is very much involved in spreading quality education through VGI.

OBJECTIVE OF THE SCIENCE FAIR

Science fair and exhibitions are being organized all over the world by renowned Universities with the simple aim to find the young talents in the schools. Some of these students may prove to be the future scientists, entrepreneurs and engineers. There was a time when India was the Vishwa Guru in the field of Mathematics, Science, Astrology etc. Education in Nalanda and Takshashila Universities are still remembered by world scientists. In order to regain its fame and fulfill the dream of Honorable Prime Minister of Make in India, Startup, Digital India, Environmental, and fight against Un-employability, there is a need to enrich our youth in modern education and skills.

World has recognized the fresh brains of the Indians. These fresh brains are available in rural areas. Unfortunately the youth of rural areas do not get the opportunities to discover their talents. The Vikrant group of institutions has realized this fact while imparting technical and management education to the students from rural areas and therefore, taken the bold step to organize a Mega Science and Technology fair.

The objective of the proposed science fair is to set up the students as interdependence between Science and Society and enabling them to expand their Scientific and Engineering skills. In order to fulfill this object the science fair will widen inquisitive minds and curiosity about science and the inmate world.

The projects which will be submitted by several young students in Science fair competition will act as launch pad for the creativity and innovations of young scientist of tomorrow. They will not only be able to compete with peers but emerge with the uniqueness by imagining the unimaginable and creating exemplary models.

GLIMPSES OF EUREKA 2019

In Eureka 2019, around 40 schools, 80 teams, 350 participants and 500 audiences turned up and visited to be an eyewitness the grand success of Eureka.

The Winner of this event receives prizes from Chief Guest Shri Brajendra Singh Rathore Ex-Minister of Madhya Pradesh.

As the overwhelming response received in the last Eureka, we are excited to host Eureka-2022.

This competition will be providing a platform for innovative students studying in any class from 9th to 12th in various schools across India. Students will have to accept the challenge and participate in various categories of Science and Technolcompetitionstion to win various awards.

Awarded First Prize of **Rs. 21000** to DPS Indore

Awarded Second Prize of **Rs. 15000** to St. John HS Rau

Awarded Third Prize of **Rs. 10000** to Shri Sai Academy Mhow
